## Professional Summary

Full Stack TypeScript Engineer with strong React and Node.js experience, specializing in AI-integrated applications, real-time systems, and scalable backend services. Built OmniChat orchestrating 8 LLM providers with streaming and automatic failover. Developed workflow automation engines, RBAC/ABAC authorization, and real-time POS with Socket.io. Strong ownership: contributed to architectural decisions, established code review practices, shipped features end-to-end. Passionate about developer tools and infrastructure products.

## Work Experience

### Application Developer (Full Stack)

DIGICOGNIT Pvt Ltd

Feb 2024 - Feb 2026

Tamil Nadu, India

- **Built scalable REST APIs** using Node.js/Express with TypeScript, PostgreSQL, and MongoDB, implementing authentication, rate limiting, and error handling
- **Engineered workflow automation system** using Node.js with async/sync processing, circular dependency detection, conditional execution, and auto-fetch chaining
- **Architected ZATCA/LHDN e-invoicing pipeline** using UBL 2.1 XML with OpenSSL signing & AES/RSA encryption for regulatory compliance
- **Optimized database performance** through MongoDB aggregation pipeline refinement and strategic indexing
- **Developed real-time POS system** using Socket.io for live inventory synchronization across multiple locations with RBAC
- **Contributed to engineering excellence** through Agile sprints, code reviews, and TypeScript best practices

## Featured Projects

### OmniChat

TypeScript, Next.js, Node.js, Vercel AI SDK, PostgreSQL

Multi-provider AI orchestration platform

- **Orchestrated 8 LLM providers** (OpenAI, Anthropic, Google, Mistral, Groq, xAI, DeepSeek, Perplexity) using Vercel AI SDK with unified abstraction layer for different auth methods, rate limits, and response formats
- **Implemented intelligent routing** with health checks, automatic failover, request queuing, and concurrent call handling
- **Built real-time streaming** with token-by-token responses, error recovery, and connection state management
- **Designed production infrastructure:** AES-256-GCM encryption, dual database support (SQLite/PostgreSQL), triple-distribution (Desktop/Tauri, Cloud, Docker)

### JobTailor

TypeScript, React, Node.js, MongoDB, OpenAI API

AI-powered job application tracking

- **Developed ATS scoring engine** using TypeScript and React with OpenAI API for compatibility analysis and skill gap identification
- **Built Kanban dashboard** with multi-version resume management and analytics tracking callback rates
- **Implemented JWT authentication**, Cloudinary PDF storage, and automated resume generation workflows

### Markdown Editor Pro

TypeScript, Next.js, Monaco Editor, IndexedDB, PWA

Privacy-first markdown editor with offline support

- **Architected client-side app** using TypeScript with IndexedDB for offline persistence and full PWA support
- **Integrated Monaco Editor** with TypeScript types, live preview, syntax highlighting, and Mermaid diagrams
- **Built export engine** generating PDF, Word (.docx), PowerPoint (.pptx), HTML with XSS protection

## Technical Skills

### Languages:

TypeScript, JavaScript (ES6+)

### Frontend:

React, Next.js, Context API, Zustand, Custom Hooks

### Backend:

Node.js, Express.js, REST APIs, Async Processing

### Database:

PostgreSQL, MongoDB, Prisma, Mongoose, Indexing

### AI/LLM:

Vercel AI SDK, LLM Orchestration, Streaming, Prompt Engineering

### Real-Time:

Socket.io, WebSocket, Event-Driven Architecture

### DevOps:

Docker, AWS (EC2, S3, Lambda, RDS), Vercel, Git, CI/CD

### Security:

JWT, RBAC/ABAC, AES-256-GCM Encryption, OpenSSL

### UI/Styling:

Tailwind CSS, shadcn/ui, Responsive Design

## Education

### B.Tech in Information Technology

University College of Engineering, Villupuram

Anna University | Graduated 2023 | CGPA: 8.3/10

## Languages

English (Professional Proficiency), Tamil (Native)
